The story of NEW TOWN

For more than a century the Casey family owned and farmed a large tract of land adjacent to the city of Williamsburg. During the 1990s changes in the land surrounding the Casey tracts became apparent. The City of Williamsburg and James City County experienced a surge in growth that previewed the future. This was symbolized by the relocation of a new and much larger Courthouse which serves the two entities and was built on a section of the Casey land.

It was then that Robert, Carlton and Lewis, the third generation of the Casey family, decided they wanted the remaining land to be developed in a manner appropriate to the tradition of the area. In cooperation with James City County, the Casey's

launched a national campaign for creative designs that would enhance the property's potential as well as complement the new courthouse. From almost 100 submissions, the firm Coopers and Robinson of New York City was selected. Their plan was for New Town.

Early on, this vision captured the imagination of a new partner, the Endowment Association of the College of William and Mary, a private foundation which manages gifts from alumni and friends of the college. Because New Town's mission would greatly benefit the college and the community, the Endowment Association considered it a sound investment that would diversify the area's economy, traditionally based on tourism, with a more stable foundation of residences and businesses. It is a partnership destined for success.

From the very beginning, the Casey family insisted on a Good Neighbor Policy that has made New Town unique among, "New Urbanism" communities. The collaboration of these two major forces, New Town and the College of William and Mary, represent the true spirit of community.
